PROFESSIONAL SUMMARY

Customer-focused MCA graduate (fresher) seeking a Technical Service Desk Analyst L1 role, providing first-level support to end users as the first point of contact via phone, email, chat and ticketing systems. Skilled in logging, categorizing, prioritizing and tracking incidents and service requests; troubleshooting Windows, Microsoft 365, hardware, software, application and basic network issues; escalating unresolved incidents to L2/L3 teams; and maintaining accurate documentation of issues and resolutions within SLAs. Foundational knowledge of Active Directory, TCP/IP, DNS, DHCP, VPN and ITIL processes. Strong verbal and written communication, with analytical strength in Excel, SQL, Python and Power BI for tracking service desk metrics. Open to morning, evening and night shifts.

CORE SKILLS

Service Desk & ITSM: First Point of Contact, First-Level (L1) Support, Incident Management, Service Request Management, Incident Logging, Categorization & Prioritization, Ticket Tracking, Escalation to L2/L3, SLA & TAT Adherence, ITIL Processes (Incident, Request, Problem Management), Ticketing Tools (ServiceNow, Remedy, Jira concepts), Phone, Email & Chat Support

Desktop & Application Support: Windows 10/11, Desktop & Laptop Troubleshooting, Printer & Mobile Device Support, Hardware Setup, Software Installation & Configuration, Microsoft 365 (Outlook, Teams, Word, Excel, PowerPoint), Application Support

Identity, Access & Network: Active Directory, Password Reset & User Account Management, Remote Access & Remote Support, VPN, Networking Fundamentals (TCP/IP, DNS, DHCP), Network Troubleshooting, Root Cause Analysis

Documentation & Reporting: Technical Documentation, Resolution Log Management, MIS Reporting, KPI & Scorecard Tracking, Advanced Excel, Pivot Tables, SQL (Oracle), Python (Pandas, NumPy, Matplotlib), Power BI, DAX, Power Query, Tableau, Git/GitHub

Key Competencies: Customer Service Orientation, Problem Solving, Communication Skills, Incident Management, Team Collaboration, Attention to Detail, Time Management

PROFESSIONAL EXPERIENCE

Data Analyst Intern | Ai variant, Bengaluru **Mar 2026 – Aug 2026**

- Logged and documented findings, issues and resolutions accurately and completely in structured records, and followed up with mentors and project teams to update status on requests in a timely manner.
- Diagnosed recurring problems through Exploratory Data Analysis (EDA) and root cause analysis, took ownership of reporting issues, and suggested process improvements.
- Maintained MIS-style reports and interactive dashboards in Power BI and Excel to monitor KPIs and track performance against targets.
- Collected, cleaned and validated raw datasets using Python (Pandas) and Power Query, ensuring accuracy and consistency in reports.
- Wrote optimized SQL queries to extract, filter, join and aggregate data from relational databases for reporting needs.
- Automated reporting with Power BI Service (scheduled data refresh), improving reporting efficiency by 30% and delivering Healthcare and Banking dashboards.
- Translated requirements from mentors and project teams into clear solutions, with validation checks to protect data quality.

PROJECTS

Healthcare Heart Disease Analysis Dashboard **Python (Pandas), Power BI, Power Query, DAX**

- Cleaned a raw healthcare dataset by handling missing values, removing duplicates, standardizing formats and treating outliers.
- Performed EDA on age, gender, cholesterol, blood pressure, chest pain type and heart rate against heart disease occurrence.
- Built an interactive Power BI dashboard with DAX measures, KPI cards, charts, and Year, Gender, Age Group and Disease Status filters.
- Delivered faster identification of high-risk patient groups and improved reporting efficiency by 30% through clear visual insights.
