PROFILE

Detail-oriented Data Analyst skilled in Power BI, SQL, Python, and Excel, with hands-on experience in designing interactive dashboards and extracting actionable business insights. Proficient in data cleaning, modelling, and visualization using end-to- end ETL workflows. Demonstrated ability to transform raw data into meaningful patterns that support business decisions. Passionate about leveraging data analytics and visualization to drive efficiency, accuracy, and strategic growth.

TECHNICAL SKILLS

- **Data Analytics & Visualization:** Power BI, Tableau, Excel (Advanced), Dashboard Creation, Data Modeling, DAX
- **Business Intelligence:** Power Query, KPI Development, Report Publishing, Data Refresh Scheduling.
- **Other Tools:** Pivot Tables, Charts, Power BI Service, Excel Automation
- **Programming & Database:** SQL (Oracle), Python (Pandas, NumPy, Matplotlib), Data Cleaning, Query Optimization

PROJECTS

Healthcare Heart Disease Analysis Dashboard (Power BI)

Tools: Python (Pandas), Power BI, Power Query Editor, DAX

Description: The heart disease dataset contained **missing values, duplicate records, and inconsistent data formats** that required preprocessing before analysis.

Task: Develop an **end-to-end Healthcare Analytics** Dashboard to analyze heart disease risk factors, patient health trends, and key clinical insights.

- Cleaned and transformed raw healthcare data using **Python (Pandas)** by handling missing values, removing duplicates, standardizing data formats, and treating outliers.
- Performed **Exploratory Data Analysis (EDA)** to identify relationships between age, gender, cholesterol, blood pressure, chest pain type, maximum heart rate, and heart disease occurrence.
- Imported and modelled the cleaned dataset in **Power BI, using Power Query Editor** for data transformation and **DAX measures** to calculate key healthcare metrics.
- Created interactive visualizations including Heart Disease Distribution, Age-wise Risk Analysis, Gender-wise Analysis, Cholesterol & Blood Pressure Trends, and Patient Health Summary using bar charts, line charts, pie charts, and KPI cards.
- Implemented dynamic **Year, Gender, Age Group, and Heart Disease Status filters** (where applicable) for interactive reporting and detailed analysis.
- Result: Delivered **a fully interactive healthcare dashboard** that enabled faster identification of high-risk patient groups, improved clinical reporting efficiency, and enhanced decision-making with clear visual insights by **30%.**

COURSES

Data Analyst 03-2026/08-2025
Excelr ,Bengaluru (Marathahalli)
Modules: Data Analytics**, Power BI, SQL, Python, Excel, Data Visualization.**

PROFESSIONAL EXPERIENCE

INTERNSHIP: Data Analyst Intern – ExcelR Solutions (6 Months)
Mar 2026 – Aug 2026 | Bengaluru

Internship Roles & Responsibilities

- Collected, cleaned, and transformed raw datasets using **Python (Pandas)** and **Power Query** to ensure data accuracy and consistency.
- Performed **Exploratory Data Analysis (EDA)** to identify trends, patterns, and actionable business insights.
- Designed and developed interactive dashboards **using Power BI and Excel** to monitor key performance indicators (KPIs).
- Built and managed **data models created DAX measures and used Power Query** for data transformation in Power BI.
- Wrote optimized **SQL queries** to extract, filter, join, and aggregate data from relational databases.
- Automated reporting processes using **Power BI Service**, including scheduled data refresh and dashboard updates.
- Ensured data quality through **ETL processes**, validation checks, and data cleansing techniques.
- Collaborated with mentors and project teams to translate business requirements into **data-driven insights and reporting solutions.**

Soft Skills

- Time Management & Organization
- Collaboration & Teamwork
- Attention to Detail
- Presentation & storytelling
- Problem Solving.

KEY ACHIEVEMENTS

- Built and delivered interactive Power BI dashboards for Healthcare and Banking analytics projects **using Python, Excel, and Power BI.**
- Improved reporting efficiency by 30% through **optimized ETL processes, data validation, and automated reporting workflows**.
- Developed dynamic **KPIs and DAX measures** to provide accurate business insights and support data-driven decision-making.
- Recognized for **creating clear, interactive** dashboards that effectively communicated insights through data visualization.

EDUCATION

- Masters of Computer Applications (MCA) | Presidency College,Bengaluru | 2024–2026

Language: English, Telugu, Kannada.
